Jerry—

Wayne and I went to the Maynard Topaz mine last week, and I've started an inspection report which is attached. I want Wayne to add any comments he might have, but the revegetation portion of the report is complete. We've just been waiting for the vegetation to become established and for a biologist to look at it.

As you will see in the report, I thought vegetation looked very good and think we can release the rest of their money. Please let me know if you agree. We'll copy you on the report when it's complete.

Thank you.

Paul and Wayne:

The pictures of the site are great. I agree that the re-vegetation has succeeded and that the bond can be released
